

## Community Green Ambassadors

We now have a fantastic team of adult volunteers who are helping us to maintain our allotment area. All learning zones are busy planning their planting and growing for the year. Carrots, onions and beans have all been sowed along with some flowering bulbs.

## Tree Planting

Alongside the Forest of Avon and the Woodlands Trust we have planted a variety of trees to build up our natural learning areas. These trees will create a mini-forest school area, mini-orchard and a copse hedging to protect the growing vegetables.

## The pond

Great news! We now have an amazing dipping platform so that we can safely investigate life in the pond.

## Wild Flower Project

We have started a whole school wild flower project which is being led by years 3 and 4 alongside nature photographer Iain Green. As the year progresses all year groups will become a part of this. In the meantime, why don't you find out about the wild flowers growing in your garden...  
green spaces?

## Wallscourt Way 20 Things Club

This is a group of learners who are exploring and developing their 21<sup>st</sup> Century Learning Skills by getting involved in nature in our local area. This has seen children building dens in the woods, making bird feeders, rolling down hills, playing team games, listening for different bird calls, making natural art and fire skills.
